Email francois.pons@pierre-fabre.com

Web www.cipf.com

Activities Cumulating multiple expertise
in Research, Industrial Development
and Production, the Centre
d'Immunologie Pierre Fabre (CIPF) is
specialised in immunotherapy of cancer
and infectious diseases. Based on an
original technology platform (carrier
proteins, viral vectors) the CIPF
develops subunit vaccines and
recombinant antibodies. As such, it
plays a unique role in the biotechnology
field.

Strong points CIPF's main projects : a
vaccine against the Respiratory
Syncytial Virus (ongoing Ph. III), a
Hantavirus vaccine (Eureka label in
1999 - in collaboration with Belgian
Rega Institute), a therapeutic vaccine
for melanoma cancer patients
(partnership with the Ludwig Institute of
Cancer Research), a humanised
antibody (cancers), a bacterial derived-
immunostimulant (bladder and colon
cancers).
